## EDUCATION

### National Institute of Technology, Tiruchirappalli

Master of Computer Applications, CGPA: 7.63

July 2018 – June 2021

Tiruchirappalli, Tamil Nadu

## EXPERIENCE

### Quoqo Technologies (P) Ltd

November 2023 – Present

Engineer II

Bengaluru, Karnataka

- Contributed to the development of Quoqo Fusion, an all-in-one legal management platform, for Quoqo, an early-stage legal startup, integrating features such as electronic signatures, AI-powered document review, and secure document storage.
- Developed and implemented features such as E-signature, seal, and stamp, as well as a generate license and implemented for billing purposes, especially for resellers. Additionally, enabled collaboration using Office 365 to facilitate seamless teamwork. Contributed to enhancing platform features, addressing bugs, and ensuring user-friendliness.

### Halliburton Development Center India (LLP)

March 2022 – August 2023

Software Developer

Bengaluru, Karnataka

- Worked on DS365.ai Dashboard to provide users with a one-stop solution for implementing various Machine Learning Algorithms.
- Developed User Interface from scratch with ReactJS components and collaborated with APIs to fetch and display dynamic data, enhancing the user experience and ensuring seamless data integration.
- Demonstrated expertise in efficient debugging and troubleshooting to facilitate production support L3 for robust problem resolution in live environments while maintaining system reliability and performance.

### HSBC Electronic Data Processing India Private Limited

March 2021 – March 2022

Analyst

Kolkata, West Bengal

- Developed a Monitoring Dashboard using Python, Dash, and CSS to generate multiple graphs on a single platform and use CRMI as a database
- Created a Python email template that generates email newsletters automatically based on the team's internal update on confluence.

### Trawello HealthyKID

December 2019 – January 2020

Intern

Trichy, Tamil Nadu

- Worked on Health Tracker Web Application, which stores and visualises student health implications based on physical tests and checkups.
- Implemented REST API for authentication and user registration.

## PROJECTS

### DriveMaster | ReactJS, Django

- Developed DriveMaster, a web-based file browser using React and Django, enabling seamless file and folder management.
- Implemented secure folder sharing with registered users and robust access control management for customizable permissions. Enhanced the user interface for better user experience and smooth file operations.

### TemplateEASE | Angular, Django

- Created a web app for uploading, editing, and downloading .docx files with formatting preservation.
- Integrated OCR to convert PDFs to DOC files, enhancing document processing capabilities.
